FernandoEsparrinha

2012

FCUP - Computer Science

Started computer studies with emphasis on theory.

2013

ISEP - Informatics Engineering

Changed university due to need of a more practical approach into programming.

2016

Celfocus - IoT Platform Thingworx

Worked on **Internet of Things** projects, mainly proofs of concept, based on the **Thingworx** platform, developing skills in **Java**, **Javascript** and **Linux**.

2018

Celfocus - IoT Microservices

CloT Vodafone V-App

Worked on a Vodafone project, developing skills on **docker** and **microservices** and experiencing an international project with a bigger scope. It was also a big opportunity to apply skills learned in previous years, improving them.

2019

ESAD - Web Platform Management

Developed **web based skills** and had the opportunity of developing a wide range of skills, due to a small team, such as **deploying**, **maintaining old code**, **maintaining multiple SQL Databases** and **supporting** applications that were hosted on **Google Cloud Platform**.
